

Mithril Resources

Mithril (ASX:MTH) is an ASX listed nickel explorer focused on growth through the discovery and development of nickel-copper sulphide resources. The Company recently entered a joint venture on the Pardoo Nickel Project in WA that is host to the Highway Deposit, a JORC-compliant inferred mineral resource of 44.7Mt grading 0.3% Ni and 0.1% Cu. Mithril is currently evaluating options to unlock the value from this large resource and has generated a number of new exploration targets for drill testing on this very prospective property. In the NT, recent geophysical surveys have highlighted a number of priority drill targets on the Company's Huckitta project. In SA, four tenements have recently been granted facilitating initial access to the Company's strategic landholding in the highly prospective and under-explored Musgrave region.
